

REGULATORY SUBSTANTIATION GUIDANCE

Document ID: REG-SUB-2024

Effective date: 2024-01-01

Publisher: Synthetic Health Products Authority

Authority: Regulatory / Government Authority (Tier 1)

PURPOSE

Promotional and clinical claims in regulated documents must be substantiated by cited evidence. Unsupported medical or regulatory statements are a high-severity failure.

REQUIREMENTS

Do not invent clinical recommendations.

Do not cite a generic source.

Do not fabricate a citation.

If evidence is insufficient, the authoring system must state that additional authoritative evidence is required.

Outdated guidance that has been superseded must not be presented as current.

DISCLOSURES

Drafts are assistive authoring artifacts. Human review is required before publication.

This document is synthetic evaluation content and is not an official government regulation.
